STACK

Frontend

ReactJS · Next.js · TypeScript · JavaScript · Tailwind CSS · HTML/CSS

Backend

Python · FastAPI · Node.js · REST APIs (Next.js)

Database

PostgreSQL · MongoDB · MySQL · Supabase

DevOps

Docker · GitHub Actions · Git · VSC · Vercel

SOFT SKILLS

Effective communication
Teamwork
Problem solving
Time management
Adaptability and flexibility

LANGUAGES

Spanish
Native

English
Intermediate B2 — advanced technical reading

Hanz Maverick Godinez Ruiz

Full Stack Developer · Quetzaltenango, Guatemala

Systems Engineering student with experience as a Full Stack Developer. Familiar with designing scalable web architectures and real-time systems, working with modern technologies such as React and FastAPI. Focused on delivering quality code and balancing functionality with user experience. Strong communication skills and proven ability to work in team environments.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

Jul 2025 - Jan 2026

Municipality of La Esperanza · Quetzaltenango, GT

- Designed and developed an internal web platform for Municipal Traffic Police management, including real-time agent location tracking, improving operational efficiency and reducing response time by 40%.
- Designed and implemented a full stack architecture (React + Next.js) with Supabase integration and automated deployment via Docker and GitHub Actions.

Frontend Developer — E-Commerce System

Jul 2024 - Nov 2024

Mesoamerican University - UMES · Quetzaltenango, GT

- Developed the frontend of an e-commerce web system using modern technologies such as React, TypeScript, and Next.js.
- Collaborated with a multidisciplinary team to integrate the frontend with APIs built in Strapi, ensuring a smooth and efficient user experience.
- Participated in the project architecture design, focusing on code scalability and maintainability.

FEATURED PROJECTS

Municipal Traffic Police Management Platform

2025

ReactJS · Next.js · Supabase · Docker · GitHub Actions

- Web system for real-time monitoring of traffic agents, with interactive maps and incident management.
- Full stack development with React + TypeScript, RESTful APIs with Next.js, and Docker deployment with CI/CD via GitHub Actions.
- Integration with a mobile app for instant reports and real-time updates.

AI-powered Waste Classifier

2024

Python · TensorFlow · Keras · OpenCV

- Image classification model (trained with TensorFlow and Keras) to identify waste types (aluminum and paper) with high accuracy.
- Real-time visualization using OpenCV, with potential for integration into smart recycling systems.

EDUCATION

B.S. in Systems Engineering, Computer Science & Computing

2021 - 2026 · Completed coursework

Mesoamericana University - UMES · Quetzaltenango, Guatemala

Focus on software development, data structures, and systems architecture.

High School Diploma in Sciences With Computing Specialization

2019 - 2020

Instituto Normal Para Varones de Occidente - INVO · Quetzaltenango, Guatemala

General education with a focus on computing, basic programming, and office software.
